# INSEARCH

Insearch is a leading photography Production house and Event Management firm in Pakistan. We provide event management and photography services to organizations in development, private and public sectors. All of our services are available on one time assignment or long term contracts basis.

## Our Mission

Plan and manage the projects with professionalism. Minimize stress for clients by keeping budget & timelines and infuse the projects with creative and innovative ideas.

## Our Values

At Insearch we always emphasize to be details oriented, right on time, consistent, organized and connected and well focused. We are motivated and patient to withstand pressures.

## About Photography

Passion and profession come together at INSEARCH as long as photography is concerned. It is a great opportunity for us to exercise our passion as professionals. We consider photography as an art that captures the imagination to the reality and there are several ways of capturing various aspects of people, culture and nature.

A common person can see only a photograph as a piece of picture. A photograph can speak more on its creativity and beauty within.

We take up photographic assignments, provide training in photography and sell stock photos under our Insearch Stock brand name.

Is there a subject or location not covered in our stock collection? Is there something specific to your business you would like us to capture? We can shoot, edit and archive for you to just select and use these photos where you need.

## Photo editing and archiving

Photo editing may be the difference between a good and a great photograph. Photo Editing is an integral part of digital photography. No picture is complete without editing. Knowing the importance of photo editing, Insearch offers expertise of professionals to exclusively edit your existing photo stock. This will help you to maintain good quality pictures of appropriate size.

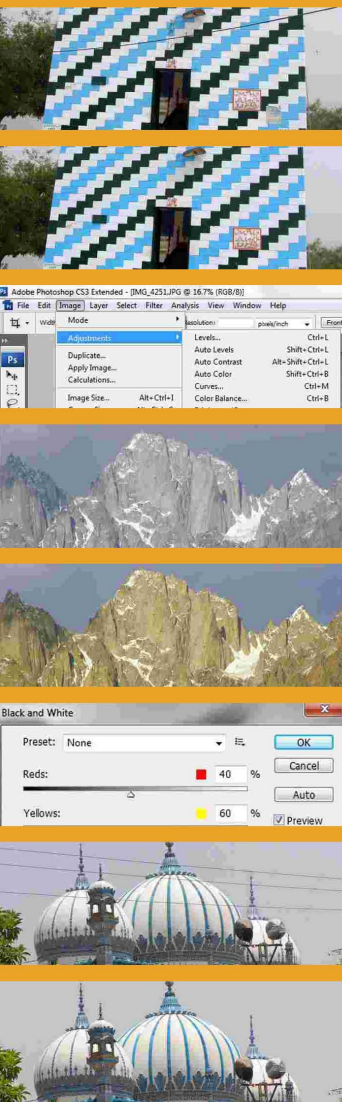

Photo archiving is another aspect of any photo collection and perhaps the most ignored aspect.

We often find people struggling to find pictures from a collection of thousands of pictures. It is like a blind folded person in a pitch black room looking for a black cat which is not there.

Good quality pictures may prove useless if you cannot find them in time when it matters the most and with the minimum effort and time consumed. Our expert will identify your organizational needs and prepare and customized archival model for your organization exactly matching your needs. You will be able to find your pictures and find them quickly when required.

We can also edit or archive your existing photo collection making it better looking and more accessible for the target users, be they in your office or across a network.

We also offer comprehensive training of Photo Editing and Archiving at INSEARCH. Please review the Digital Photography Training course brochure.

## Photography Awards

Awards are acknowledgment of the skills of an individual in any field. These awards and recognition by different organizations show the passion, expertise and hard work of our work in photography.
